Data engineer / Technical Business analyst

Summary: I'm a 9 years experienced technical business analyst and data engineer specializing in the deployment of data oriented private banking asset solutions. As a data technical expert, I use my business and technical knowledge to build business oriented solutions using SQL, PL/SQL, Python language or ETL solutions such as Informatica Power Center, DBT, Pyspark. My goal is to become a well-rounded professional capable of bridging the gap between raw data and business needs.

Data Engineer

- The primary objective of this project is to develop a robust and user-friendly tool capable of predicting whether a flight will be delayed or arrive on time. This predictive system aims to provide passengers, airlines, and airport operations teams with actionable insights to better anticipate disruptions and improve decision-making.
- Full ETL pipeline with PySpark + pandas from Lufthansa & OpenWeatherMap APIs
- Data architecture & UML modeling on MongoDB
- REST API with FastAPI + Swagger UI
- ML models: Logistic Regression, Random Forest, XGBoost (best performer) Trained and evaluated with scikit-learn
- Apache Airflow orchestrates hourly data collection, ETL, and model retraining
- Prometheus + Grafana stack for metrics, dashboards, and alerts
- Fully containerised and production-ready with Docker (FastAPI, MongoDB, Airflow, ML inference, Prometheus, Grafana)
- End-to-end, automated, monitored, and scalable flight delay prediction platform.

Data Engineer / Technical Business Analyst

- Worked as a Data Engineer / Technical business analyst within the RISK department on various projects. Especially, I was able to work on compliance/regulatory and risk subjects
- Translate business needs into detailed functional and technical specifications, ensuring alignment with business goals and regulatory standards
- Designing and implementing database structures, including tables, indexes, and views
- Developing and optimizing using SQL and PL/SQL code for data manipulation, validation, and reporting
- Write, modify, and integrate SQL and PL/SQL code in the existing custom solution.
- Design, develop, and maintain ETL processes to extract, transform, and load data from multiple sources into a data warehouse with Python or Informatica power center
- Technical environment : Java, Angular, Python, SQL, PL/SQL, VBA, Informatica Power Center, Talend, Swagger

Technical Business Analyst & Project Manager

- Worked as a Business Analyst in all the life cycle application steps (Requirement analysis, Requirement specification, Solution design, Support development, Testing, Bug and incidents follow up, Change management) within the Digital factory to implement digital tools such as eBanking, mBanking, CRM tool, Onboarding tool
- Monitor the performance of the eBanking platform and identify opportunities for optimization based on user feedback and market trends.
- Training management session for the end users as well as assistance for the end users after the go-live and creation of training materials
- Project Manager activities such as: Project planning and Roadmap creation, Development Team coordination, Project Risk management, Budget oversight, Client communication
- 2nd and 3rd level functional and technical support of eBanking and mBanking applications for Azqore Private Banking client
- Web design and mockup creation to implement UX and UI improvements
- Technical environment : Java, Angular, SQL, PL/SQL

Technical Business Analyst / Product Owner

- Worked as a Business Analyst under Global Transaction Banking COO on various projects. Especially, I was able to work on project related to the compliance OFAC subject. The main objective was to improve the OFAC filter with new rules to help the OFAC agents to be able to identify easily the suspects payments
- Production of reports and analysis for the follow-up of Global Transaction Banking performance and NBI
- Product owner activity such as: Manage and prioritize requirements on the different level, Proactively design solutions, Lead the planning product release, Stakeholders management, ensure the commitment and motivation of the business throughout the projects, challenge stakeholders vision and promote innovative solutions

 Functional and Technical skills**Agile methodology and IT certifications**

- Professional Scrum Master™ I (PSM I)
- Professional Scrum Product Owner™ I (PSPO I)
- ITIL Foundation Certificate in IT Service Management

Project management & Business Analyst

- Project management methodology
- Agile SCRUM
- Test management (UAT, SIT, FAT)
- Business requirement analysis and writing
- Workshops organization and lead with the client
- Technical specifications documentation
- BPMN, UML diagram
- UX/UI design (wireframing and/or design)
- Data analysis and Data modelling

 Web development**Languages**

- Javascript
- SQL, PostgreSQL, PL/SQL, NoSQL
- PHP
- CSS, HTML
- Python
- VBA

 Languages **French: Native speaker** **English: Fluent** **Tools****Scrum and Business analysis**

- Jira, XRAY, Confluence
- Office suite, VBA

API

- Postman
- Fastapi

Data

- SQL Developer, MySQL, PostgreSQL, MongoDB
- DBT, Elasticsearch
- Snowflake
- Kafka, PySpark
- Docker
- FastAPI

Monitoring and Automatisation

- Cronjob
- Prometheus Grafana
- Gitlab
- Airflow

- Use of SQL request and database management system (PostgreSQL, DBeaver, Oracle) to analyse the application data
- Designing and implementing database structures, including tables, indexes, and views
- Perform SQL tuning for queries with long execution times.
- Web design and mockup creation to implement UX and UI improvements
- Technical environment : Java, .Net, Angular, SQL, PL/SQL

Mines Paris - PSL - Engineering Degree - Data Engineering

- Data Engineering training certificated by Mines ParisTech
- Data Pipelines – Design and automation using Python, Airflow, Kafka, and Docker
- Databases – Advanced data modeling and management with SQL and NoSQL (MongoDB, PostgreSQL)
- Cloud & DevOps – Deployment and orchestration on AWS, GCP, and with Docker Compose
- ETL / ELT Processes – Data extraction, transformation, and loading from APIs, files, and databases
- Data Modeling & Architecture – Structuring data for analysis, scalability, and performance
- Machine Learning Pipeline Integration – Embedding predictive models into production-ready workflows
- Monitoring & Data Quality – Implementing tools for data validation, tracking, and observability
- CI/CD & Version Control – Managing data projects with GitHub Actions, Docker Hub, and best DevOps practices
